From this graph, can infer that 66.49% people use Android app for twitter and less than 13% people use iPhone app and 20% prefer to use the web app for twitter.

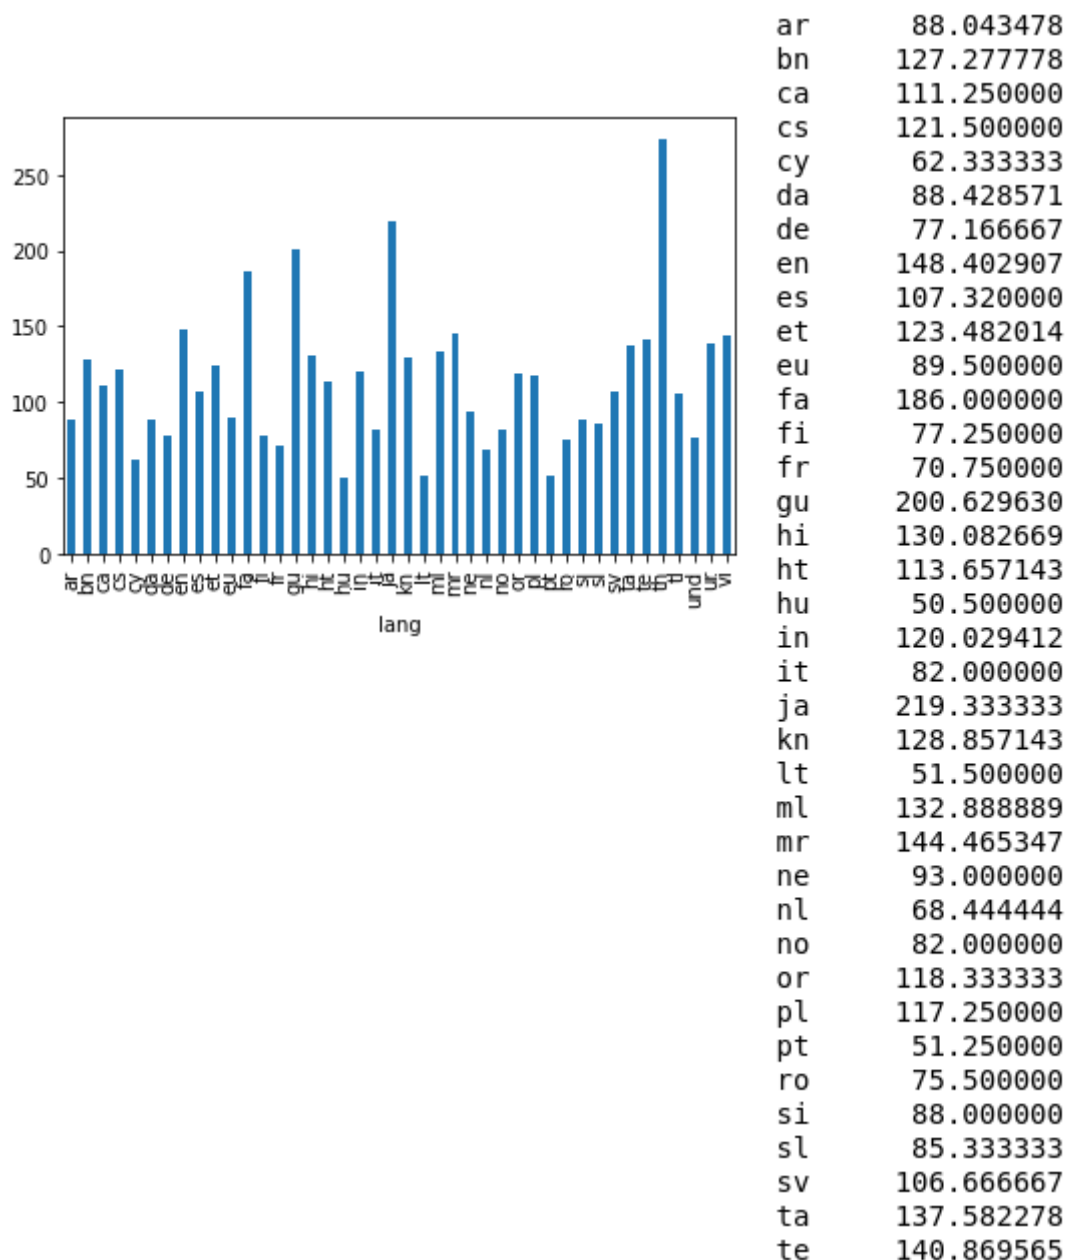

According to the above graph, the most popular language amongst twitter users is English, followed by Hindi and emojis/images.

Visit : twitter.ayushgoyal.tech

The number twitter 'verified users' is significantly less than non verified users, which is expected.

This graph shows the plot of average tweet length vs the language. We can see that for english, the average length is around 150 and hindi is 130.

Below are the top 10 most followed tweeter accounts

```
array(['AajTak', 'ABP News', 'Wasim Akram', 'Zee News English',
       'Shoaib Akhtar', 'MANOJ TIWARY', 'Sorabh Pant', 'Geo News Urdu',
       'Republic', 'DNA'], dtype=object)
```

The graphs below show the retweet counts and followers numbers for the top 10 retweeted users. We can understand that even the user with low followers have more retweets than the most followed user. Thus one aspect of user behavior we can understand is that people retweet on the basis of tweet content rather that the person tweeting.
